

# SINCE 2018...

- Syphilis cases have increased in Canada by **109%**
- Confirmed early congenital syphilis cases have increased by **599%**

# HEALTHCARE PROVIDER EDUCATION CAN MAKE A DIFFERENCE!

Healthcare providers have the power to help reduce syphilis rates in our communities, but we need help to better understand their educational needs.

**TAKE OUR  
SURVEY!**

Information gathered through this survey will help us create accredited CME and PD curricula that will strengthen healthcare provider knowledge, skills and comfort to better address syphilis.
